

Press Release

05/20/2013 - 10:30 a.m.

In a formal ceremony, held May 15th, Gov. Maggie Hassan and the Executive Council recognized Department of Information Technology (DoIT) employees Diane Gleason and Gary Palmer; along with Department of Transportation (DOT) employee, Armand Nolin, as part of the State's Suggestion and Extraordinary Award Program.

Award recipients were recognized for their outstanding performance, leadership and contribution to the successful development and implementation of the Current Billing System (CBS) for DOT; which supports billing for Federal Highway Administration (FHWA) for reimburseable work DOT projects.

From left to right: Michele Peterson (DoIT/ASD), Patrick McKenna (DOT), Gary Palmer (DoIT/ASD), Diane Gleason (DoIT/ASD), Armand Nolin (DOT), Terri Marcelli (FHWA), Patrick Bauer (FHWA) and Gail Hambleton (DoIT/ASD).

The development and implementation of CBS has provided significant process efficiencies; supporting streamlined billing and revenue collection of highway funds for the DOT. Immediate cost savings were realized for the DOT by way of application development savings that reach hundreds of thousands of dollars. The continued use of this proprietary application affords the DOT the ability and flexibility to integrate data compilation, reporting and revenue collection with existing State systems; providing additional cost savings and process efficiencies long-term.

The Department congratulates each of the award recipients on this wonderful accomplishment; this recognition and award are well deserved.
